About me

Full-Stack developer with nearly 10 years of experience in PHP, WordPress, and complex web development. I'm currently transitioning to creating solutions with Artificial Intelligence and Machine Learning using Python. Passionate about continuous improvement, code efficiency, and problem-solving with real impact. I'm open to new opportunities where I can contribute my experience in web development while applying artificial intelligence to automate and optimize processes.

Work history

Powdevs - BillingTree | A REPAY Company / Full Stack Developer

2020 - 2024

- Optimized the generation of daily financial reports in XML/PDF, improving processing speed by refactoring queries and backend.
- Participated in debugging critical payment issues in production, applying version control and traceability best practices.
- Participated in the development and implementation of new features such as secure authentication using email codes (2FA).

Rivka Development - Sales Simplicity Software, Inc. / Full Stack Developer

2019 - 2020

- Developed feature enhancements for a custom WordPress plugin called "Options Online," used on the residential sales site Sales Simplicity (USA).
- Implemented XML scripts to automate the export of property data (prices, availability, etc.), facilitating the management and updating of real estate inventory.

Vagapp Soluciones / Full Stack Developer

2015 - 2019

- I was responsible for the development and support of web projects for clients in Mexico, implementing customized solutions in CMS such as Drupal and full-stack technologies. Some of my most notable projects include:

- WedProduction: A social network-style wedding platform, developed from scratch in Drupal. It allowed for quotes, event creation, vendor profiles, and more.

- VisitMexico: An informational site that centralized all tourism and cultural events in the State of Mexico.

- Arizona Driver Club (AZ Drivers): A platform for quoting and comparing different auto insurance plans.

Education

Instituto Tecnológico de Sonora (ITSON) / Software Engineer
2011 - 2015

The career was completed in that period of time.

Languages

-
- Spanish (native)
 - English (advanced)
